Introduction and why this course - Written Assignment

My name is Aparna Pattanayak. I have enrolled in Data Science Course in Edyoda. I have completed my Bachelors in Engineering in Electronics and telecommunications. Then I went on to pursue my Masters of Engineering in Signal processing from Pune University. I stay in Nashik, Maharashtra. I had started my carrier as a QA in core electronics company. Then gradually I had developed interest in Python coding and machine learning while doing my masters. Which then ultimately lead me to join this Data Science course from EdYoda. I am a quick learner and also, I have a good problem-solving ability. I have good logical and analytical thinking approach towards problems.

Data Science is one of the growing fields in IT sector. As initially I had interest in Python coding, I had decided to join this course to learn more and get in-depth knowledge about data analysis and machine learning. Along with this the course is giving a brief introduction to data analysis and data wrangling. This course had also helped me to learn Python coding which is one of the most used programming languages these days in IT sectors.

The course of Data Science given by Edyoda would also help me to get a job in IT sector so this course is helping me to develop my communication skills and preparing me for the interview which is also an important part along with the technical knowledge. So, I find this course helpful and it has helped me to update my technical knowledge and helped me in self grooming.
